

Download How To Make Planer Tune Up Diy Woodworking Plan

10 tune

You'll most likely need to do this after planing wood with high sap, tar, or oil content, such as pine or teak. Be careful not to cut your fingers on the knife edges. Tip 9 When knives dull, they often tear the wood or pull chunks from the surface, so replace or sharpen them at the first sign of dulling.

WOOD PLANER TUNE

If this build up gets thick enough it'll encourage planer shavings to jam up, causing problems during heavy cuts. Rubbing paste wax onto the sides of the shroud offers two benefits. Not only do the solvents in the wax help dissolve any buildup that's present, but they also make the surface smooth, slippery and less likely to get grungy before your next blade maintenance session.

How To Build 3 Basic Hand Planes

Prepare one of the plane bodies for glue-up. Spread glue on one of the cheeks, keeping the glue about 1/8 in. back from the layout lines for the body blocks, so that squeeze-out is minimal in the central cavity of the plane. Next, apply glue to one face of each of the body blocks and place them on the cheek.
